- Oriental Small-clawed Otter
- Slender-tailed Meerkat
- White-cheeked Gibbon

help save the world's wildlife

# Their future is in your hands

Many of the world's species are teetering on the brink of extinction. A number of these threatened species are cared for by Perth Zoo.

You can help Perth Zoo continue as a world-class Zoo by supporting crucial breeding and reintroduction programs and by making a bequest to Perth Zoo in your will.

Since 1898, Perth Zoo has formed part of the Western Australian culture. Most Western Australians have fond memories of the Zoo and return with loved ones to share their experiences.

Today, Perth Zoo is still that important place and is a centre for conservation and environmental education. It is recognised internationally as one of the first zoos in the world to be completely redesigned for conservation aims.

Perth Zoo is assisting many species through captive breeding, release of species into the wild, education, conservation programs and research.

Your bequest will ensure this work continues to benefit our society and future generations.

General bequests made to Perth Zoo are credited to an all-purpose fund from which the Zoo makes allocations for its development and collections according to need.

Alternatively, you may wish to indicate a specific area where you would like your bequest used. Some of the possibilities include:

- Native Species Breeding Program
- Exotics Breeding Program
- Education Program
- Preservation of the Zoo's Botanical Collection
- Zoo Heritage Preservation

Our mission:  
"to advance the  
conservation of wildlife  
and to change community  
attitudes towards the  
preservation of life  
on Earth"
